### **Lung cancer - Wikipedia**

Sat, 22 Sep 2018 14:38:00 GMT Performing a chest radiograph is one of the first investigative steps if a person reports symptoms that may suggest lung cancer. This may reveal an obvious mass, the widening of the mediastinum (suggestive of spread to lymph nodes there), atelectasis (collapse), consolidation (), or pleural effusion. CT imaging is typically used to provide more information about the type and extent of disease.

### **Asthma - Simple English Wikipedia, the free encyclopedia**

Fri, 21 Sep 2018 16:20:00 GMT Asthma (or Asthma bronchiale) is a disease that hurts the airways inside the lungs. It causes the tissue inside the airways to swell. Asthma also causes the bands of muscle around the airways to become narrow. This makes it hard for enough air to pass through and for the person to breathe normally. Asthma also causes mucus-making cells inside the airways to make more mucus than normal.
