Introduction: When Tony Hawk wants to launch himself as high as possible off the half-pipe, how does he achieve this? The skate park is an excellent example of the . conservation of energy. The law of conservation of energy tells us that we can never create or destroy energy, but we can change its form.*

*Thu, 04 Oct 2018 03:11:00 GMT THE LAB ACTIVITY. Purpose – The purpose of the energy skate park simulation is to see how energy gets transferred in a real world application. In this simulation you will manipulate the skater and track to determine how it affects the energy of the system. In our skate park, there is no friction until part C, so you will not be dealing with that factor.*
