Psychotherapy For Ischemic Heart Disease An Evidence Based Clinical Approach

Sun, 16 Sep 2018 06:39:00 GMT A stroke is a medical condition in which poor blood flow to the brain results in cell death. There are two main types of stroke: ischemic, due to lack of blood flow, and hemorrhagic, due to bleeding. They result in part of the brain not functioning properly. Signs and symptoms of a stroke may include an inability to move or feel on one side of the body, problems understanding or speaking ...
